

FEDERAL GAS TAX FUND PROJECT HIGHLIGHT

MUNICIPALITY OF THE DISTRICT OF ARGYLE

THE WEST PUBNICO SEWER EXTENSION PROJECT

National objectives: Cleaner environment & building stronger communities

Federal Gas Tax Fund contribution to project: \$115,981

Total project cost: \$470,140

The West Pubnico Sewer Extension project is an excellent example of how a municipality can partner with the business community to improve services and safeguard the environment. To avoid possible failure of aging onsite sewer systems, the Municipality of the District of Argyle extended its wastewater infrastructure to connect four local businesses on Dennis Point Road. Knowing the integrity of its local water supplies is imperative for consumption and processing, the Municipality installed 765 meters of wastewater line to connect commercial seafood processors and a restaurant to its municipal treatment facility.

This project contributes to a cleaner environment by replacing old onsite septic systems, thus eliminating the possibility of groundwater contamination. In addition to protecting local water supplies and the businesses that rely on them for operating, it also builds a stronger community by providing opportunities for future development on Dennis Point Road.
